

Audiocodes' Huddle Room Solutions

Help the channel find the perfect fit with Audiocodes' variety of huddle room solutions to fit all sizes of meeting room.

As businesses slowly begin to transition to a sense of normality, long distance communication is still going to provide the key to continued efficient collaboration.

With a range of products and solutions, from portable speakerphone to immersive conference phones for the larger meeting, Nuvias UC can help resellers find the right solutions for their customers.

The Room Experience Suite includes [Meeting Insights](#) – Audiocodes easy-to-use capture and analysis software helping users organise, and gain real-time access to, key meeting moments and takeaway action items. Using innovative Voice.AI technology, users are assured all important discussion points are captured.

Nuvias UC aren't just a distributor, we're a technology enabler.

For more information on how we can offer [Professional Services](#) to assist in the purchasing, implementation and maintenance of Audiocodes' Huddle Room Solutions, get in touch with one of our Account Managers by email at sales@siphonnetworks.com or by phone on 01635 225000.

RX10 Speakerphone

The most versatile and portable option of the Room Experience Suite, the RX10 speakerphone provides consistently high-quality voice while able to connect to any mobile device.

Having been produced alongside [Jabra's](#) premium sound design, users can ensure they'll be receiving clear audio within a 4sqm meeting space.

The RX10 is perfect for small meeting rooms or on the go workers, up to 2 participants.

RX20 Huddle Room Voice

The RX20 Voice Solution turns any space into a smart meeting room, offering full integrations with Microsoft Teams and Skype for Business applications.

When combined with the RXV80 Collaboration Bar, the RX20 room solution supports video-enabled collaboration sessions for an even more immersive meeting room experience.

RX50 Conference Phone

The RX50 offers a comprehensive voice solution combining exceptional sound design with easy use and management all wrapped up in a modern design that blends in with the modern meeting space.

Leveraging the audio quality of [Dolby®](#), the RX50 enables dynamic levelling that adapts to the shape and surface material of the meeting room while ensuring volume level is instinctively maintained to an appropriate level and quieter voices can be enhanced without external, unwanted noise being a distraction.

This level of quality voice can be sustained up to 6 metres, supporting meeting spaces with up to 8 participants with a pick-up range of up to 15sqm.

RXV80 Collaboration Bar

For the truly immersive meeting environment, a device that enables consistent video is a huge benefit.

The RXV80 adapts to varying light conditions and accommodates all number of different room dimensions and sizes. Built into the device is Intelligent Acoustics™ software that facilitates targeted voice pick-up giving all participants an equal chance to be heard.

This all-in-one video collaboration device boasts a 110-degree, wide angle lens with a fixed-focus 4K sensor enabling HDR video mapping.

As with all the devices within Audiocodes' Room Experience Suite, the RXV80 offers this wealth of features within a sleek, compact design.
